SPITFIRE trailers are premium quality, anodised aluminium boat trailers that provide excellence in convenience, leading drive-on and towing performance, and longevity.

We achieve this by design and utilisation of all 3 of the best materials available for boat trailer construction.

- ✓ Aluminium (which we anodise and harden), in a bolted chassis
- ✓ Stainless Steel 316
- ✓ High-Density Polyethylene (HDPE)

Our range suits fibreglass and alloy boats from approximately 4m to 8.5m... requiring trailers with a GTM/ATM rating from 750kg to 4500kg.

SPITFIRE ALUMINIUM TRAILERS Adelaide Trailer Range						
Model	Axles	Trailer ATM kg	Approx Tare kg	Chassis LOA (m)	Chassis width (m)	Approx boat size (metres) (Min - Max)
560-750	1	750	180	5.20	2.20	4.0 - 4.8
